***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I. Claims 1-4 and 14, drawn to an apparatus for forming a plurality of individual wrapping bags from the sheet, classified in Class 53, subclass unknown.

Group II. Claims 5-13 and 15-17, drawn to the products such as a medicine wrapping sheet, classified in Class 206, subclass 528 and others.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a materially different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product as claimed can be made by another and materially different apparatus such as the product as claimed can be made by hand or without requiring the sheet comprises a polyethylene terephthalate and a bi-axially oriented polyethylene polypropylene sheet or without a minute flaw formed on one of the polyethylene terephthalate sheet and a bi-axially oriented polyethylene polypropylene sheet.

Because these inventions are distinct for the reasons given above due to the amendments to claims 1 and 2 and have acquired a separate status in the art because by their different

classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.

A telephone call was made to Applicant's representative on 7/5/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
